**MEDICAL CLEANING**

P-Laser USA  
Interview with  
MSNBC

# P-Laser USA Medical Cleaning

- Extensive experience in autoclave cleaning and other medical equipment.
- Thorough understanding of sterilizer performance, specifically how accumulated minerals and contaminants can affect the sterilization process.
- Build up of contaminants on chamber walls → discoloration  
→ reduced performance  
→ contamination of sterilized
- Our cleaning process includes **manual scrubbing**, **laser cleaning** (where applicable), **friendly chemical solutions** and a thorough rinse with a **neutralizer**.
- This eliminates contaminants, leaving a clean chamber and ensuring compliance with regulatory standards for annual cleaning.

# Why us?

- Experience:
  - 15+ years in autoclave/sterilizer cleaning
  - 7 years in laser cleaning
- Locations in the Midwest and West Coast. We travel to our clients anywhere in the US
- Competitive pricing
